Press Release: Martin Collins Equine Surfaces Proudly Supports Phillip Dutton Eventing

19 August 2011 – Lexington, KY.

Martin Collins Equine Surfaces proudly announces their partnership with Olympic Gold Medalist, 12 time USEA Leading Rider recipient and FEI world ranked event rider, Phillip Dutton.

Dutton said: “We are very excited to have MC Ecotrack® installed here at True Prospect Farm. It is by far the best surface to ride on for the welfare, longevity and soundness of our horses. It is low maintenance, dust free, and hands down the best footing on the market for the health and comfort of the horse and rider.”

Martin Collins Equine Surfaces, the UK’s market-leader of premium footing, now brings decades of installation expertise, in-depth industry knowledge and superior product offerings to the American market.

MCES has a strong presence in Europe with both private farms and event installations at international shows and FEI World Cups. They are experts on the beneficial effects of footing on equine locomotion and have laid more than 2,000 stadium and private arenas in the UK and throughout Europe.

MC Ecotrack® is a low maintenance product combining the proprietary ingredients in CLOPF® fibers, soft rubber and high grade sand which are carefully weighed & blended with a wax coating. This premium product is featured at multiple private facilities, international competitions and is suitable for demanding professionals and dedicated amateur equestrians alike.

Dutton noted that, “The existing climate on the east coast exposes our competition horses to regular concussion which can take years off of their competition life. Europeans have recognized the importance of the investment in their daily riding surface, and the US riders are quick to catch on as well. This footing takes my horse’s soundness and confidence to a whole new level.”

Martin Collins Equine Surfaces understands the importance of educating the US market on the science of equine surfaces and they are dedicated to bringing a positive and changing mentality within the equestrian industry. They are delighted to be entering into a partnership with Phillip Dutton, who shares the same level of passion and commitment to the equestrian industry.

Martin Collins can provide footing solutions on a variety of different levels, be it a small private ring or a large competition venue. They can consult to provide appropriate products and materials for those who prefer to ‘do it yourself’, or they can provide full construction services to undertake projects which range from the single horse owner to large commercial projects.

Please peruse their impressive list of US clients and ambassadors, which includes such notables as Rodrigo Pessoa, Tuny Page, Lisa Wilcox, and Kathy Priest, at <http://www.martincollinsusa.com>
